- Plug and play
- Adaptive image
- 1080p full HD video
- USB-A 2.0/3.0
- Built in microphone
- H.264 Compression
- 30FPS

## Camera Selection

Please ensure that you connect the camera to an available USB port on your computer. If possible do not use a USB HUB, however a powered (active) USB HUB can be used.

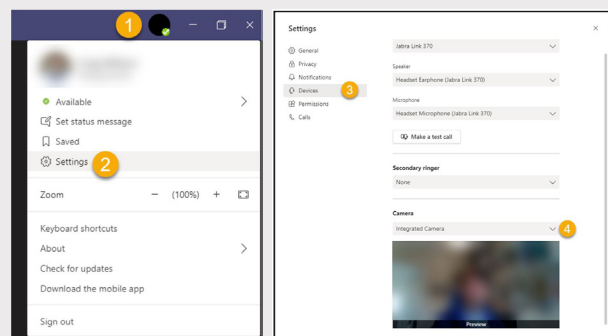

## Skype for Business

1. In your Skype for Business window, click the **Options** button
2. Select **Tools**
3. Select **Video Device Settings**
4. Select the correct camera called **UVCamera**

## Teams

1. In Teams, click your **Status** indicator in the top right of your Teams window
2. Select **Settings**
3. Select **Devices**
4. Then please chose the correct camera called **UVCamera** and click close.

## Other Video Solutions

Other solutions can also use this CD01 camera, and you should check your provider's Documentation and Settings section of the application on how to change the camera selection.
